
Phillips-Medisize Presents Innovative Packaging Concepts and Connected Drug Delivery Devices During PharmaPack Paris

February 7-8 at Stand A46

HUDSON, WI – January 30, 2018 – [phillipsmedisize](http://phillipsmedisize.com) – Phillips-Medisize, a Molex company will showcase its continuum of contract services including device strategy, product development and manufacture across pharmaceutical primary packaging and specialty drug delivery devices, dosing & dispensing systems, inhalators, spray applicators, as well as wearable drug delivery devices designed to improve patient engagement and drive better outcomes.

Visit Phillips-Medisize at stand A46 during PharmaPack Paris to learn about the values and benefits of choosing a trusted outsource partner and how the company can help turn a complex drug delivery device idea into a successful project. Phillips-Medisize representatives will share the company's value proposition and its strategic platform based on several recently accomplished project examples.

Furthermore, a wide variety of innovative solutions for packaging and safely administering medicines can easily be discussed such as concepts to meet the requirement for tamper evident packaging, which is one of the major considerations in the development of packaging for ophthalmic applications.

About Phillips-Medisize:

Phillips-Medisize, LLC, a Molex company, is a leading global outsource provider of design and manufacturing services to the drug delivery, consumable diagnostics, medical device, and specialty commercial markets. Backed by the combined global resources of Molex and its parent company Koch Industries, Phillips-Medisize's core advantage to customers is the knowledge of its people to integrate design, molding, and automation, providing innovative, high-quality manufacturing solutions.
